On Valentine's Day, a
tomato-red menu is served
by "Red Gold from Europe",
specially created for
seduction.

*This dinner for Swedish lovers is an aphrodisiac menu based on canned
tomatoes: soft cheese in tomato sauce, baked salt cod with potatoes and olives
in tomato sauce and tomato and almond chocolate cake.*

NAPLES, Italy, Feb. 12, 2025 /PRNewswire/ -- One of the most beautiful and heartfelt acts of love is to prepare delicious homemade dishes for your partner, even better if they are hot red and spicy. **Canned tomatoes are perfect for a lovers' dinner**, and with a touch of chilli, dinner will be even more 'piquant'. Therefore, here's a **special Valentine's Day menu based on organic canned tomatoes by "Red Gold from Europe"**, the international project supported by ANICAV (the National Association of Canned Vegetables Industries) and co-funded by the European Union, which promotes and enhances the export of Italian organic canned tomatoes to Sweden and their consumption. **As a gift for Swedish sweethearts, here are three tasty recipes: an appetiser of soft cheese in tomato sauce; a main course of baked salt cod with potatoes and olives in tomato sauce; a chocolate cake made with canned whole peeled tomatoes and almonds.**

A tip for 'spicing up' the dinner is to add a drizzle of chilli oil to the canned tomatoes: this boosts their flavour and adds that aphrodisiac touch, perfect for Valentine's Day. **Thanks to their excellent quality, canned tomatoes are widely used in cuisines around the world.** From a nutritional point of view, their properties change according to the level of water content and the techniques used to process the raw tomatoes. Juices, peeled tomatoes and sauces, for example, contain more water, are almost fat-free, and have about 3g of sugars per 100g, mainly glucose and fructose. Canned tomatoes contain high levels of vitamins and mineral salts, especially vitamin C, carotenoids, potassium, phosphorus, zinc and selenium, while they also contain lycopene, an important and powerful antioxidant with protective properties against cancer. Now, without further ado, head to the kitchen to prepare a **"red", "spicy" and "healthy" Valentine's Day dinner.**
